AMF Tromp and AMF Den Boer – formerly Tromp Group – provide best in class unit equipment and fully-integrated bakery solutions for the global baking industry. Together, AMF Bakery Systems, AMF Tromp, and AMF Den Boer help bakers grow their product portfolio with confidence to produce soft bread and buns, sheeted artisan breads, pizzas and flatbreads, cakes and pies, and pastries and croissants. Along with the latest bakery innovation, AMF provides expert design and applications engineering, production expertise, full-system integration, project management, installation, training and lifetime parts and service support.

Commissioning Software Engineer (CSE)

Gorinchem

What are you going to do?

The Commissioning Software Engineer (CSE) startup the lines for testing in the factory, validates the safety program and manages information technology solutions that meet the needs of the business. The CSE works closely with other experts to develop solutions and manage projects that facilitate process improvements. To be successful we expect you to participate in phases of software development, including requirement specification, design, implementation, software integration, testing, and documentation required to meet company procedures. You will work independently on assigned projects and tasks, effectively using other resources as needed and be able to test and validate technical solutions based on best practices (e.g. standard tools). You will work closely together with colleagues from different departments and external partner(s) for implementations of machinery parts and problem solving. You will be responsible for code, test and troubleshoot applications utilizing the appropriate hardware, software platform, database, programming tools and technology. You are perfect in giving feedback of actions points. Drive the continuous deployment and improvement of process through the Markel Business System (MBS)

What do we ask from you?

You have a Post-secondary college (Dutch MBO) in Industrial Automation, Information Technology or other computer science and experience in working with Siemens and Allen Bradley PLC's (Siemens TIA Portal and Studio 5000) is a must. Minimum 2 years of Commissioning Software experience working at medior level in manufacturing environment. Experience with agile programming methodology and troubleshooting. Approaching problems in a practical manner instead of a theoretical way. You have a customer focus and understanding of production deadlines and perfect communications skills; active listening and writing (Dutch and English). Understanding of product development and manufacturing methodologies to achieve high quality lines in the test period towards the start of FAT. You have a Independence and good judgment, positive attitude, and an innovative spirit and displays a commitment to continuous improvement through problem solving and employee involvement. It is a plus if you have experience in programming structured text or programming in visual Basis/C++ and also knowledge of Eplan electrical drawings.

Willingness to work about 10% of the time on site at customer location.

Required competencies: Teamworker, motivator to influence others, results orientated and technical excellence.
