AMF Tromp and AMF Den Boer – formerly Tromp Group – provide best in class unit equipment and fully-integrated bakery solutions for the global baking industry. Together, AMF Bakery Systems, AMF Tromp, and AMF Den Boer help bakers grow their product portfolio with confidence to produce soft bread and buns, sheeted artisan breads, pizzas and flatbreads, cakes and pies, and pastries and croissants. Along with the latest bakery innovation, AMF provides expert design and applications engineering, production expertise, full-system integration, project management, installation, training and lifetime parts and service support.

Mechanical Engineer

Bunschoten

Bachelor or master's degree in mechanical engineering? Interested in machine design? Help us build the best in class production lines in the bakery industry! By intensive elaboration with the bakers in the industry, our machines are the result of years and years evolution. Now it is time to build the next-generation production lines by improving the value (functionality divided by cost) of our machines, using the latest knowledge in mechanical construction design principles. Use degrees of freedom and finite element method software, think in functions and parameters, be creative and analytical, and use brainstorming and daily basis design reviews with your teammates. You will be responsible for the value of our bakery machines. We offer a high-tech playground for you to explore and to develop the way we do engineering in a growing organization with huge opportunities. Help us to build a 'great place to work'-organization, where the best engineers build the best in class machines!

What are you going to do?

Simply said: Design Baking and Handling systems! As an engineer you are responsible for all engineering documents. You calculate mathematical as well as simulation. You understand functional, safety and hygiene specifications and you identify risks through failure mode and effects analysis. You design in 3D CAD and check the feasibility of your design (manufacturing, assembly, maintenance). Finally you ensure your machine gets a good life by realizing the manual.

What do we ask from you?

You have a bachelor or master's degree in mechanical engineering and a minimum of 3 years of experience as a mechanical engineering working in a manufacturing environment. Besides your experience, you're a team player and you have the ability to multi-task in a changing environment with fluctuating priorities and deadlines.
