

AMF Tromp and AMF Den Boer – formerly Tromp Group – provide best in class unit equipment and fully-integrated bakery solutions for the global baking industry. Together, AMF Bakery Systems, AMF Tromp, and AMF Den Boer help bakers grow their product portfolio with confidence to produce soft bread and buns, sheeted artisan breads, pizzas and flatbreads, cakes and pies, and pastries and croissants. Along with the latest bakery innovation, AMF provides expert design and applications engineering, production expertise, full-system integration, project management, installation, training and lifetime parts and service support.

## Quality Engineer/Inspector

### Bunschoten

As Quality Engineer/Inspector you are responsible for a number of quality engineering functions, including design, manufacturing, sustaining, primarily identifying and driving the resolution of internal and external quality issues. Furthermore, you are also responsible for driving continuous improvements focusing on reduction in nonconforming material (Rework, Repair, Scrap).

#### **What expertise are we looking for?**

You have knowledge of developing and communicating quality measures within the module in line with Quality, identifying and driving the resolution of internal and external quality issues through ownership and use risk processes. You provide hands on technical and quality system support for new product introduction, projects, including hardware and software products and where necessary, you work with suppliers to improve and sustain quality improvements. You will support Manufacturing Operations in efforts to drive process improvement and on time delivery and you lead internal audits.

Of course, you coordinate with all departments as Sales, Engineering, Purchasing and Manufacturing to resolve both internal and external customer complaints.

Geometric Dimensioning and Tolerancing (GD&T), Metrology, Calibration, Gage Repeatability and Reproducibility (GR&R), Measurements Systems Analysis (MSA), Applied Statistics and Lean Manufacturing sound familiar to you!

#### **Most important Competencies required.**

You will have good communication skills oral and written in English and Dutch. You can work effectively on different levels internal and external without close supervision. You have good leadership skills and are self-motivated with at least 3 years of quality experience. We ask flexibility, and familiarity with Lean Manufacturing principles is a plus. You are accurate and have the drive to permanent improvement.

#### **Interested?**

Please send your resume to Irma Berendsen, HR Business Partner, [i.berendsen@trompgroup.nl](mailto:i.berendsen@trompgroup.nl). Information about AMF Tromp and AMF Den Boer is available at [www.trompgroup.nl](http://www.trompgroup.nl).
